

Isaiah King

IT Support, Systems Implementation and Software Development

Atlanta, GA | 943-216-6636 | isaiahking2120@gmail.com | github.com/IsaiahKing2120

PROFESSIONAL SUMMARY

IT support and implementation professional with 6+ years of experience across restaurant technology, enterprise storage and State of Georgia deployments. I troubleshoot hardware, software and connectivity issues through resolution, validation and handoff. My development work spans C#/.NET applications, C++ game development, React web interfaces, and PowerShell and Python automation.

PROFESSIONAL EXPERIENCE

Computer Technician

ProLogic ITS | Jun 2026 - Present

- Deploy Windows desktops and laptops for State of Georgia agencies using MDT, SCCM and PXE, with agency-specific software and configuration.
- Configure Windows 11 Enterprise, drivers and firmware; verify device functionality, BitLocker encryption and recovery-key escrow before deployment.
- Diagnose and repair hardware and provision iPads. Track assets and inventory, tag and laser-etch devices, and coordinate warranty replacements.

Implementation Engineer

Translucent Services | Pure Storage Contractor | Sep 2025 - Jan 2026

- Installed and configured Pure Storage systems for enterprise deployments, including capacity expansions, datapack additions and storage upgrades.
- Isolated hardware, connectivity and configuration issues with customers and engineering teams.
- Completed post-change validation and technical documentation to support handoffs to customer teams.

IT Support Lead

KFC | Sep 2022 - Jul 2025

- Led Tier 2 troubleshooting across restaurant locations for Windows workstations, POS systems, kiosks, printers, payment devices and telephony.
- Resolved escalated application, account, email and network issues while working within service-level agreements (SLAs).
- Reduced downtime by 30% through proactive monitoring and rapid issue resolution.
- Coached junior staff on diagnosis and ticket documentation, and coordinated vendor support, hardware replacements and system updates.

Help Desk Technician

Del Taco | Dec 2019 - Sep 2022

- Provided Tier 1 and Tier 2 support for Windows workstations, applications, printers, POS/payment systems and network issues across multiple locations.
- Restored service through remote troubleshooting, workstation setup and hardware replacement. Documented symptoms, fixes and escalation details.

Additional Experience

Political Canvasser | Campaign Industries (Shawn Harris Campaign) | Jan 2026 - Apr 2026

- Adapted communication for varied audiences and handled sensitive, high-volume public conversations.

TECHNICAL SKILLS

Windows deployment: Build and validate Windows 10/11 installations using MDT, SCCM and PXE, including drivers, firmware, BitLocker and device provisioning.

User support and access: Resolve Microsoft 365, account and peripheral issues. Work with Active Directory, Microsoft Entra ID and remote support tools to restore access and service.

Hardware and networking: Diagnose TCP/IP, DNS, DHCP and VPN issues. Repair PCs, support POS/payment devices, and install and validate Pure Storage systems.

Software development: Build C#/.NET applications and C++ game features. Structure application logic in modules that can be debugged, tested and extended.

Front-end development: Build web interfaces with React, HTML, CSS and JavaScript/TypeScript, including interface structure, styling and interactive components.

Automation and testing: Write PowerShell and Python tools, manage changes with Git/GitHub, and use debugging, automated builds and unit tests to check software behavior.

SELECTED PROJECTS

M.O.N.D.A.Y. Personal AI Assistant

C# / .NET 9, ASP.NET Core, SQLite | 2026 - Present

- Developing a C#/.NET assistant that connects natural-language conversation with local system tools, project file inspection and coding tasks.
- Integrated Ollama and cloud model APIs with SQLite storage for conversations, task history and action records.
- Built a local web interface and VS Code companion with review steps for commands and file changes, plus edit backups and an undo workflow.

KTD Technician Toolkit

C# / .NET, PowerShell | 2026 - Present

- Developed a portable Windows diagnostic engine with 20+ automated checks covering hardware, operating-system health, storage, encryption and security agents.
- Expanding the platform for repair shops and MSPs with customer intake, ticket tracking, inventory, invoicing/POS workflows and role-based staff access.
- Building an owner dashboard for license issuance, revocation, subscription tiers and updates, with guided business setup and technician-readable reports.

TCG Shop Simulator and Card Game Rules Engine

C# / .NET 9 | 2026 - Present

- Developing a modular .NET shop simulation with inventory, pricing, customer purchasing and store progression, alongside an original card-game rules engine.
- Implementing turn flow, combat, deck validation and persistence across separate projects, using automated builds and unit tests to check game-rule changes.

EDUCATION AND CERTIFICATIONS

Google IT Support Certificate

IBM Full Stack Developer Professional Certificate | In Progress
